

Europe's gateway to power markets

Expand your power trading activities across Europe with ease

Brady's physical power trading solution is unique.

Specifically designed for short-term trading, it affords sophisticated data management and TSO communication to address the complexities of these markets.

Whether you own small or large production or consumption portfolios, you can be empowered to be a leader in power trading.

Unrivalled heritage in market design

Brady has over 30 years' experience in energy. We have been at the forefront of exchange market design, helping to develop the operations for the first power exchange in Europe. Our software continues to be shaped by developments across the most liquid energy markets in Europe, to meet the highest standards for power trading.

Flexible deployment and pricing

Deploy on-premise or via the cloud.

Scale across your organisation with ease as your business grows into new markets.

Select stand-alone functions to fit your specific business needs.

Works with your existing systems

You can transfer data between other systems such as forecast data providers and ETRM solutions.

Supports the physical trading life cycle including:
